DIVESH BELOSE

NETWORK SECURITY ENGINEER

+91 8767112134 | dbelose07@gmail.com | Pune, Maharashtra |

CAREER SUMMARY

Network Security Engineer at TCS with 4.7 years of experience in managing and troubleshooting NGFW technologies including Palo Alto. Skilled in firewall policy management, VPN, NAT, and Network Security Operations. Familiar with Wireshark for network traffic analysis and troubleshooting

Experienced in incident handling, root cause analysis, and working with clients, vendors, and cross functional teams to ensure secure and stable network environments. Strong communication skills with a focus on timely issue resolution and operational efficiency. Continuously learning new technologies and best practices in cybersecurity to enhance performance and support business needs.

Also having experience in AWS infrastructure, Linux, and networking, with expertise in EC2, IAM, VPC, RDS, S3, R53, Dynatrace, Prometheus and Grafana, Terraform. Skilled in monitoring, troubleshooting, and optimizing cloud environments for performance, reliability, and cost efficiency.

EDUCATION AND CERTIFICATION

BSc IT | JSM Collage, Mumbai University 2021

MCA | Mumbai University 2025

TECHNICAL SKILLS

- **Network Security:** Palo Alto Firewall, FortiGate Firewall, VPN, NAT, Firewall Policy Management
- **Cloud:** AWS Cloud Operations, EC2, VPC, IAM, CloudWatch, Route53
- **Networking:** TCP/IP, DNS, DHCP, SIP, VoIP
- **Support:** Incident Management, Troubleshooting, RCA, ServiceNow, Jira, Wireshark

WORK EXPERIENCE

Network Security Engineer | TCS **2022 - Present**

1. **<u>Palo Alto Firewall Operations</u>**

- Initial setup and deployment of Palo Alto firewalls in enterprise environments.
- Integrated firewalls with Panorama for centralized policy management.
- Configured and troubleshoot IPsec VPN tunnels and HA (Active-Passive) setups.
- Managed security policies, NAT rules, zones, and interface configurations.

- Executed PAN-OS upgrades, downgrades, and device resets.
- Configured core services including DNS, DHCP, NTP, and service routes.
- Implemented advanced features such as Virtual Wire, SSL Decryption, DNS Sinkhole, and WildFire.
- Strengthened network security using profiles like DoS Protection, Zone Protection, and URL Filtering.

2. FortiGate Firewall Management

- Monitored firewall health, traffic logs, and interface status to ensure uptime
- Created and modified security policies and NAT rules based on service requests
- Performed basic troubleshooting for network and connectivity issues
- Verified IPsec VPN tunnel status and escalated issues when required
- Handled incidents and service requests using ServiceNow as per defined SLAs

SECURITY OPERATIONS & INCIDENT MANAGEMENT

- Managed incidents, service requests, and change implementations via ServiceNow within SLA timelines.
- Performed initial troubleshooting and implemented approved changes in firewall/security environments.
- Generated reports and dashboards to track performance and operational metrics.
- Maintained documentation including sops, firewall inventory, and upgrade records.
- Coordinated with vendors for issue resolution, license management, and support activities.

CERTIFICATIONS

1. Microsoft Certified: Azure Fundamentals
2. AWS Certified Cloud Practitioner
3. Cisco CCNA Basics - Udemy
